EDUCATION

Texas A&M University, College Station, TX

Est. May 2028

BS in Computer Science, Minor in Statistics

GPA: 3.97 / 4.00

- Top 0.5% of A&M engineers; Engineering Honors: Enhancing the Development of Global Engineers

EXPERIENCE

Data Scientist

Sep 2025 – Present

Southwest Airlines × Aggie Data Science Club, Texas A&M University

College Station, TX

- Designing a 0–100 scoring system standardized across airports and seasons that reflects how disruptive weather conditions are to Southwest Airlines operations, using FAA and open-source data
- Collaborating with Southwest professionals through Texas A&M's Aggie Data Science Club to develop a machine learning-based solution with a clean UI that can be clearly interpreted by non-technical executives

Peer Teacher

Sep 2025 – Present

Texas A&M University

College Station, TX

- Assisting students with Python programming concepts during lectures and office hours
- Grading assignments and quizzes with constructive feedback to support learning

Undergraduate Researcher

May 2025 – Present

Aggie Research Program, Texas A&M University

College Station, TX

- Coauthoring two research papers comparing the effectiveness of different univariate and multivariate machine learning and time-series models in forecasting cow-calf gross revenue
- Performed Boruta feature selection and Optuna hyperparameter tuning to optimize predictive performance
- Implemented residual diagnostics, multi-metric evaluation (MAE, RMSE, R^2 , etc.), and data visualization to validate and analyze model performance

Undergraduate Researcher

May 2025 – Aug 2025

Aggie Research Program, Texas A&M University

College Station, TX

- Developed a Django web application for disease prediction that accepts natural language descriptions of symptoms and displays predictions from integrated machine learning models
- Integrated Google Gemini and spaCy NLP pipelines to interpret input and convert it into model features
- Designed a responsive UI for veterinary use with real-time predictions and integrated performance visualizations

Project Manager

Aug 2024 – May 2025

Aggie Coding Club, Texas A&M University

College Station, TX

- Led a team of peers across multiple subgroups to build Strive, a scheduling and productivity application for Texas A&M students built with React Native and Firebase
- Directed development of the frontend and backend, ensuring scalability and real-time data synchronization
- Oversaw planning, feature design, and version control to streamline workflow and deliver functionality

PROJECTS

- News-Driven Stock Trading Algorithm – *Pandas, NumPy, Alpaca*
- Automated Mean Reversion Pairs Trading Portfolio – *Pandas, NumPy, Alpaca*
- [Personal Website](#) – *React*
- Strive (Scheduling App) – *React Native, Firebase*
- [Humble](#) (Celebrity-Style Insult Generator) – *NLTK, aitextgen*

SKILLS

Programming Languages: Python, C++, Java, JavaScript, HTML, CSS

Technologies: SQL, TensorFlow, PyTorch, scikit-learn, statsmodels, LightGBM, Prophet, NumPy, Pandas, React, React Native, Flask, Django, NLTK, BeautifulSoup, aitextgen

Tools: Git, Firebase, Docker, Microsoft Word, Excel, PowerPoint, Google G-Suite

Spoken Languages: English (Native), Marathi (Native), Japanese (Beginner)
